

# G2G Ebb & Flow Tables

The G2G Ebb & Flow Rolling Table (also referred to as a rolling bench) is an easy to use, waterproof, hydroponic system which focuses on maximizing available grow area. Equipped with irrigation systems, G2G Ebb & Flow Tables can pump and drain water effectively. These rolling benches can be stacked side by side and by using a series of rollers, tables can be shifted left or right. As such ebb and flow tables only require 1 aisle for work, wasting no space. All of Good 2 Grow's Ebb & Flow Tables are custom made to ensure that every customer's needs are met. These rolling benches are available in custom lengths based on three widths; 1.22m, 1.52m or 1.7m.

## FEATURES & BENEFITS

- Molded polystyrene ebb & flow trays
- Galvanized steel brackets made easy to fasten
- All parts pre-drilled, pre-cut, pre-punched; easy to assemble
- Customizable lengths to maximize grow space
- Steel tables available in 1.22m, 1.52m and 1.7m widths
- Plastic trays available in 4.5cm and 10.2cm heights
