

# G2G Propagators

## G2G PROPAGATION TRAY & DOME

The G2G Propagation Tray & Dome is the perfect solution for germinating or cloning your plants. This propagation kit increases the moisture and temperature within the domed environment. This ensure accelerated plant growth and healthier plants. Unlike standard propagation trays, G2G Propagation Trays have straight, vertical sides maximizing tray area. Each G2G Propoagation Kit comes equipped with a dome that uses two top vents, these can be opened or closed to ensure optimal humidity and temperature. G2G Propagation Trays & Domes can be sold seperately or together.

Item Name	G2G Propagation Kit	G2G Propagation Tray
Length (cm)	54.1	54.1

Height (cm)	25.4	7.1
Color	Black/ Transparent	Black
Includes Dome?	Yes	No

## G2G PROPAGATION SEPERATOR

The G2G Propagation Seperator simplifies the process of creating seedlings. By seperating all your seedlings into ideal cell sizes allows, growers maintain ideal temperatures between plants while optimizing root growth, plant development and seed germination. Each G2G Propagation Seperator is made of durable plastic ensuring that trays will not crack on transport. G2G Propagation Seperators come in three sizes: 72 cells, 128 cells and 200 cells, perfect for all growers' needs.

Item Name	G2G Small Seperator	G2G Medium Seperator	G2G Large Seperator
Length (cm)	54	72	90
Width (cm)	27	36	45
Height (cm)	5.9	5.9	5.9
Cell Thickness (mm)	1.0	1.0	1.0
Square Cells	72	128	200
