

G2G Plastic Drying Products

G2G PLASTIC PERFORATED DRYING TRAY

G2G Perforated Plastic Drying trays are made of durable, long lasting, heat resistant, food grade polypropylene. By adding additional perforations on the sides of all G2G drying trays, all G2G Drying Trays are manufactured to maximize airflow in order to homogenize drying potential. G2G Plastic Drying Trays are available in three different hole diameters; 3mm, 5mm and 10mm. For all your wet trimming needs, Good 2 Grow Plastic Drying Trays fit perfectly with G2G Drying Racks.

G2G PLASTIC CURING CONTAINERS

The G2G Plastic Curing Containers are engineered to provide easy access to the interior of the container while ensuring the containers remain air tight. All Plastic Curing Containers are made of food grade polypropylene and come equipped with a triple layer, moisture proof seal. Each G2G Plastic Curing Container possesses an air tight compartment to easily add any humidity packet or scent altering accessory. All G2G Plastic Curing Containers come installed with wheels which increase mobility of the containers. Available in two different sizes and two different colors.
